

EventStuffV1

- calEventStuffV1

- ▷ contains "event-level" information (**Marius** updated midas meta data)
 - vertex frame TS for good data (all 10 FEBs present, sync'ed)
 - overall (first and) last TS for event
 - possibly other information (range for x-detector sync/time calibration?)
- ▷ accessor functions - note type(mismatch), but should not be a problem

```
// -- direct accessors
uint64_t startFrameEventData() {return fConstants.eventData.startFrame;}
uint64_t endFrameEventData() {return fConstants.eventData.endFrame;}
uint64_t startFrameGoodPixelData() {return fConstants.pixelData.startFrame;}
uint64_t endFrameGoodPixelData() {return fConstants.pixelData.endFrame;}
```

- CDB updated for **datav6.3=2025V1**

- ▷ retro-fitted also **datav6.3=2025V0**
- ▷ deployed to mu3edb:5050/merlin7

⇒ Please let me know in case of problems!

- in case you prefer your own JSON file analysis

- ▷ `merlin7:/data/project/mu3e/data/2025/raw/00?/run0XXXX.mid.lz4.json`
